The specification has been amended, claim 9, 16-23 have been amended, claims 1-8, 13, 15 have been canceled by the preliminary amendment dated May 29, 2001.

Claim 9, 10 and 17 have been amended by the amendment dated January 28, 2002.

Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 23, drawn to a delivery system comprising a non-retroviral expression vector, an adenovirus and/or plasmid, classified in class 435, subclasses 320.1, 325, 455, and class 424, subclass 93.21.
- II. Claims 9-12, 16-22 (claims dependent there from), 23-29 drawn to a retroviral vectors derived from a non-primate lentivirus genome comprising the leader sequences between the end of the 5' LTR and the ATG of *gag*, wherein the genome lacks the *tat* gene, classified in class 435, subclass 320.1. Note that claims 23-29 as filed are improper claims and indefinite, and thus, should Group II be elected, claims 23-29 must be amended to reflect the elected claimed invention and will be examined to the extent that the claims are encompassed by the claimed invention of Group II.
- III. Claim 15, and claims dependent there from (16-22), drawn to a hybrid vector system comprising a poxvirus and a retrovirus, classified in class 435, subclass 320.1.

The inventions are distinct, each from the other because of the following reasons:

Although there are no provisions under the section for "Relationship of Inventions" in MPEP 806.05 for inventive groups that are directed to different methods, restriction is deemed to be proper because these methods appear to constitute patentably distinct inventions for the following reasons: Inventions I, II, and III are directed to different and materially distinct product, as indicated above. The products as claimed in Group I, II, and III are structurally distinct and contain materially distinct sequences, and thus, the products of each Group would generate distinct functions with respect to their site of action. Given that Inventions I, II, and III comprise

materially distinct steps and/or generate different functions and effects, and thus, are not required for use together, it would also be unduly burdensome for the examiner to search and/or consider the patentability of the claims.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their divergent subject matter, fall into different statutory classes of invention, and are separately classified and searched, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner *Dave Nguyen* whose telephone number is **(703) 305-2024**.
